

Research workshop

Reshaping cities through data and experiments

Ulysses Exchange Programme Ireland-France:
Maynooth University (Maynooth, IE) – Ecole de Mines (Paris, FR)

A conversation with researchers from Maynooth University and the Ecole de Mines on contemporary smart cities and the theoretical, methodological and empirical issues related to experimental and data-driven approaches to urban development and living. Some of the issues that the workshop will address are the new forms of public, private and civic engagement and the new economic arrangements; the interaction between data, algorithms, planning practices and urban governance; the role of testbed and digital urbanism in shaping city governance and everyday life.

9:30 - 15:30, Tuesday 30th May, 2017

Room 2.31, Iontas Building, North Campus, Maynooth University
